- JavaScript Advance – 100/100
- JavaScript Application– 100/100
- JavaScript Front-End – 100/100
- JavaScript Web– 100/100

About Me

- My name is Victor, and I'm from the beautiful city of Plovdiv, Bulgaria. I am currently a student at Software University (SoftUni), specializing in front-end web development. My journey into programming began in mid-high school, and it has been a fascinating adventure ever since. I primarily work with JavaScript that many might dislike, but I genuinely love for its versatility and power. As the second child in a family of three, I have always been driven to carve my unique path. With only three months left until I graduate, I'm excited to continue my journey into the world of Computer Science at a university in Europe.
