- Course: Front-End JS** – 10/2024 - 12/2024
- Course: Back-End JS** – 01/2025 - 02/2025

LANGUAGES

- English** | Advanced
- Bulgarian** | Advanced

SUMMARY

I'm Victor, a full-stack developer who graduated at the top of my class from the Software Engineering program at Software University (SoftUni). My programming journey began in high school and quickly grew into a true passion. I primarily work with JavaScript a language I value for its versatility and power. As the second of three siblings, I've always been driven to forge my own path. After completing my education at SoftUni, I'm now focused on pursuing a Bachelor's degree in Computer Science in another European country to further expand my knowledge and skills.

PROJECTS

PHOTO-STARR

Jul 2025 – Aug 2025

A fun website for taking, customizing, and sharing photos in themed sessions.

DEEZER-STARR

Apr 2025 – Jun 2025

An app for managing and interacting with music playlists, likely integrating with the Deezer music platform.

TABLE-STARR

Jun 2025 – Jul 2025

An app that lets users track their orders and easily split the bill with others.

TASTY-LIST

Mar 2025 – Apr 2025

An app for managing and sharing lists of favorite recipes or foods.
